

EC TEST

Alternative Footprints to
accomodate a range of sensor
pin spacings.

This board adapts the Membrapor S200 sensor - 34.4 mm PCD
to the Membrapor Smart AFE4.0 board - 17 mm PCD.

This will enable the S200 sensors to be calibrated 4x at a time
on the Membra Sens 4Ch digital board without needing to
solder wires to the solder tags (which need to be removed again
after calibration).
